WOOD FLOOR FILLER

PALL-X FILLER

Waterborne fiber-reinforced wood filler compound for wood floors

Description

PALLMANN[®] PALL-X FILLER is a patented fiber-reinforced wood filler compound. Suitable for solid strip, plank, engineered or parquet flooring. PALL-X FILLER uses sanding dust to create the perfect color match. PALL-X FILLER is rated for radiant heat floor systems and should be used where colormatching, stability, wide joints, and adhesion are vital.

Features

Benefits

- Fiber-reinforced
- Mixes with sanding dust from floor
- No-clog formula
- Fast drying

- Holds well in gaps
- Natural color match
- Will not load abrasives
- Less downtime

MIXES WITH SANDING DUST

Technical Data

Packaging: Color:

Stability: Mixing Ratio:

Working Temp.: Coverage Rate: Ready for Sanding: Storage:

1 U.S. plastic gallon (3.78 Liters) Yellow when wet, color-matched to species when dry At least 12 months Blend to a paste consistency that can be trowel applied $65 - 75 \,^{\circ}F (18 - 25 \,^{\circ}C)$ for optimum performance Approx. 400 sq. ft. per gallon, depending on floor condition 20 - 25 minutes Store between $50 - 70 \,^{\circ}F (10 - 20 \,^{\circ}C)$. Keep from freezing.

Directions for Use

Shake product well prior to mixing with 80 – 100 grit edger or buffer sanding dust. Pour the PALL-X FILLER into a 'crater' of sanding dust on the floor to be filled. Using a stainless steel trowel (Item #12506), blend the liquid with the dust to achieve a trowelable paste consistency. Trowel apply to the floor, filling all joints and gaps.

NOTE: From time to time it will be necessary to add more PALL-X FILLER to the mix on the floor to maintain a paste-like consistency. PALL-X FILLER may also be mixed with sanding dust in a bucket prior to trowel application.

Important Notes

The filling application should be made before the final cut with the belt or drum sander. The floor can normally be sanded 20 to 25 minutes after filling. High humidity and / or low temperature conditions may extend the dry time while increased ventilation and airflow may reduce dry time. PALL-X FILLER must be removed with a belt sander or the PALLMANN SPIDER.

Do not attempt to remove PALL-X FILLER with only a single drive plate rotary buffer. To ensure proper color match, test filler, stain and finish in an inconspicuous area. Do not use with bamboo floors.

Clean Up

Tools and applicators should be cleaned with water.

Storage

Minimum 12 months in original packaging when stored under normal conditions (50 – 70 °F / 10 – 20 °C). Tightly reseal opened containers. Keep from freezing.
